DVV Clarification for 7.1.2

DVV Findings:

Value updated as per attachment provided by HEI.

HEI Response:

In response to the DVV findings, we would like to justify that, we have implemented a wide range of measures on our campus to promote energy efficiency, waste management, water conservation, and a clean, green environment. Our institution has undertaken several initiatives to achieve these goals. Following are the initiatives taken by the institution to implement accomplish the goals mentioned above.

1. Alternate sources of energy and energy conserving measures

- We have installed solar panels as an alternative energy source for the campus, reducing our reliance on traditional power grids.
- To minimize energy consumption, we have replaced old tube lights with energy-efficient LED bulbs, which now fulfil 52.12% of the campus lighting requirements.
- A significant portion of the campus is covered with greenery, which acts as insulation and reduces the heat island effect, resulting in reduced fan and air conditioner usage.
- We have placed informative signboards across the campus to educate students about energy-saving practices.
- We conduct energy audits to monitor energy usage and identify the areas for improvement.

2. Management of various types of degradable and non-degradable waste

- To facilitate waste management, we have strategically placed dustbins across the campus, clearly labelled for degradable and non-degradable waste disposal.
- A compost pit has been established to handle degradable waste, with the resulting compost used for fertilizing the campus garden.

- "Plastic-free zone" signboards have been installed in the campus to encourage students and staff to minimize plastic usage.
 - Non-degradable waste is responsibly disposed of by sending it to the Municipality Corporation of Harapanahalli town for effective management.
3. Water conservation
- Rainwater harvesting is employed for non-potable purposes such as garden maintenance and washrooms, reducing energy usage and also this water is used to prepare distilled water for science laboratories.
 - Regular maintenance ensures that water transportation pipes are promptly repaired to prevent water wastage through leaks.
 - Some part of the waste water obtained from the drinking water filtration is used for watering the plants in the garden by supplemented with natural fertilizers, without compromising plant growth.
4. Green campus initiative
- Our institution has developed a policy document outlining our commitment to sustainability and environmental conservation.
 - Energy audits, efficient waste management practices, green space management, and plantation drives are regularly conducted to support our green campus objectives.
 - The staff and students of the institution use the public transport and bicycles maximum and less dependent on private vehicles that can shrink the carbon footprint to a large extent.

To summarize, we are taking numerous initiatives for the clean and green achievement and making the students well aware about that. Herewith, we have attached the documents related to the points mentioned above.

Green Campus Policy

Institute Vision:

1. To inculcate moral and ethical values and stress the importance of the National integration, social responsibility and communal harmony among the students.
2. Enable each student to acquire necessary skill and make a meaningful contribution to the well-being of humanity.

Institute Mission:

1. To provide qualitative higher education to the students of educationally and economically backward area and to focus for the all-round development of the students.
2. To achieve excellence in teaching, learning and evaluation through advanced technology.
3. To bring the rural folk into the main stream of higher education.
4. To promote social awareness among the students regarding the environmental, rural health and social issues.
5. To aim at women empowerment.
6. To develop creative and innovative ideas for the enrichment of human life.

Green Revolution, the best solution to arrest pollution. A D B First Grade College pledges to be part of the solution.

When implementing green ideas on campus, our institution ought to show greater accountability and empathy. The campus sustainability programs were started with the intention of fostering environmentally friendly behaviors both inside and outside the institution and creating best practices approaches to environmental management. Although creating and maintaining a green campus is crucial, our top priority is educating stakeholders and raising student knowledge of green practices. The policy begins with knowledge and concludes with an action plan. Our organization will then fairly manage water resources, waste management, protect natural resources, offer eco-friendly services, and advise utilizing minimal paper. In order to create and maintain a green campus, the institute will put the following practices into practice. It will also support green activities outside of the campus. This will result in safe environment that is a better place to live, learn and play.

Water Management

- Always practice and implement rain water recycling and harvest rain water to resolve and manage water scarcity problems in future
- Protect environment towards climatic changes and conservation of sources for drinking water.
- Regularly inspect taps for draining and repair immediately to avoid loss of potable water.
- Promote effective water management drip pipe lines, recycling of drainage and rain water harvesting.

Tobacco Free campus

- According to institute policy and rules the use of tobacco products is treated as offence.

Green initiatives beyond the campus

The planning and encouragement of green campus initiatives should extend outside the campus. The management has a strong commitment to sustainability and will always support the institution's efforts to integrate it into campus life and beyond. Due to this, this college has participated in campaigns like the Swchata Abhiyan Rally to promote green neighborhoods. Students from the NSS have cleaned the Harapanahalli IB, the KSRTC bus stop and our campus to raise awareness about pollution management in the local community. Under the direction of the NSS College Programme Officer, NSS volunteers will launch the student-led Green Campus programs.

Save Energy TIPS

1. Activate power management features on your computer and monitor so that it will go into a low power "sleep" mode when you are not working on it.
2. Turn off your monitor when you leave your table.
3. Activate power management features on your laser printer.
4. Whenever possible, shut down rather than logging off.
5. Turn off unnecessary lights and use daylight instead.
6. Avoid the use of decorative lighting.
7. Use LED or compact fluorescent bulbs.
8. Keep lights off in conference rooms, classrooms, lecture halls when they are not in use.
9. Use the fans only when they are needed.
